

WooCommerce Videos

[SUPPORT](#)[OUTSOURCING](#)

1. WooCommerce Videos

Enhance your online shop with product videos

Videos Plugin for WooCommerce by createIT allows you to add multiple videos to your products. Add Youtube, Vimeo and HTML5 Videos anywhere you wish on your product page!

No coding knowledge required.

2. General information

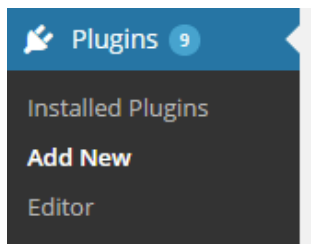

We would like to thank you for purchasing WooCommerce Videos! We are very pleased that you have chosen our plugin to extend your website. We are doing our best to not disappoint you! Before you get started, please check out these documentation pages. WooCommerce Videos can only be used with WordPress and we assume that you already have WordPress installed and ready to go. If you do not, please see [WordPress Codex](#) to get started.

2.1 Installation and activation

Installation via Administration Panel

When WooCommerce Videos files are downloaded from your Themeforest account. You can start installation using WordPress administration panel.

Once you logged into your administration panel go to *Plugins > Add New*

Then:

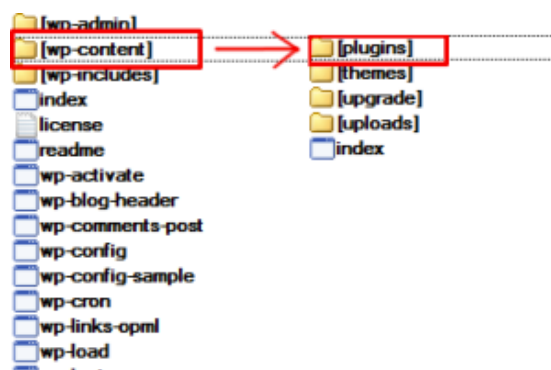

Chose *Upload* (1), click *Select a file* (2), ct-videos.zip from your hard drive and click *Install Now*(3)

Installation via FTP

To install WooCommerce Videos via FTP follow step below:

- **Step 1** – Unarchive ct-videos.zip file
- **Step 2** – Access your host web server using FTP client
- **Step 3** – Find directory *wp-content* > *plugins*
- **Step 4** – Put folder ct-videos.zip in directory *wp-content* > *plugins*

2.2 Support

All of our items come with free support, and we have a dedicated support forum to handle your requests. Free support is limited to questions regarding the theme's features or problems with the theme. We provide premium support for code customizations or third-party plugins. If you need help with anything other than minor customizations of your theme then you can contact premium@createit.pl

For free support, follow the steps below

- **Step 1** – [Click Here](#) to create free forum account, you will need your **Themeforest** purchase code which can only be received after buying the theme from Themeforest.net.
- **Step 2** – You need to enter your Themeforest Purchase Code, e-mail and a password.
- **Step 3** – Once you are signed up, you need to sign into the forum with your new account and you can start using the forum.
- **Step 4** – Find your theme on forum [home page](#).
- **Step 5** – Create new issue with button from the right hand side.

Before You Post On Forum

To help speed along your request, we ask you to follow the steps below before posting a new topic on the forum. This is for the benefit of everyone and will help make the entire forum more efficient:

- **Step 1** – Always check the [Documentation](#) and the [Knowledgebase Section](#). Most questions can be answered in those areas
- **Step 2** – Always perform a [Forum Search](#) before you post, its possible your issue has already been brought up and has been answered.
- **Step 3** – If your question has not been brought up, then please post a new topic. Always be as specific as possible. Our form for creating a topic requires that you enter the live URL to your home page or the page that shows the issue in question. The form also has fields for WP and FTP login info. Those fields are not required, however providing us with your login information upfront can save a lot of time for both parties. All login credentials are securely stored and are only accessible by our support staff.
- **Step 4** – We usually answer questions in 24h on working days. However if you don't get any answer in 72h bump up your question or send us a [mail](#)

Our support hours are 10:00 AM – 6:00 PM UTC + 1 Monday to Friday.

Premium Support

We can create your website from scratch, redesign it or just extend existing ones. For more information, please take a look at [our website](#).

Typical issues covered by Premium Support:

- Custom CSS
- Support for third party software and plug-ins
- WordPress Installation with Theme configuration
- Server configuration

- Site structure modifications
- Graphic adjustments, etc
- WordPress general howto's

2.3 New Video

To add a new video to your WooCommerce product, please follow the steps below:

Adding a video:

1. Open 'Edit Product' page
2. Open 'Videos' tab in 'Product Data' metabox
3. Click 'Add Video' button
4. The form with following fields will appear:
 - *Video Title* – you may add a title for your video to keep order in your videos. By default the id is set as a title.
 - *Enter external video URL* – paste a link from one of these sites: https://codex.wordpress.org/Embeds#Okay.2C_So_What_Sites_Can_I_Embed_From.3F but only Youtube and Vimeo will be responsive and will have autoplay option.
 - *Or upload a video* – instead of using external links, upload your own video via media library (it will not work if the previous field is not empty). MP4 is the safest format, but it's recommended to upload .webm or .ogg (or both) as well to make sure it will play in every browser. To convert the video files you can use one of the free online converters like this one: <http://www.online-convert.com/> . If wrong format will be chosen, it will not be saved. If you want to choose already uploaded video, you can change 'All media items' to 'Video' in upper left corner of media library box, to choose only from videos. Uploaded videos will be responsive.
 - Video Location:
 - *Tab* – create a new tab, next to the Product description – video will be displayed inside the tab,

Morbi laucibus nunc ligula, at volutpat quam accumsan eu. Nam justo sit amet enim sodales, non laculis dui tempor. Integer eget purus felis. Sed laoreet gravida quam nec eleifend. Integer placerat ullamcorper tincidunt placerat nisi tincidunt ut.

- Made from 100% pure cotton
- Soft touch jersey fabric
- Crew neckline

Add a video whenever you want with Shortcode

- *Location priority* – changes the action or filter priority so it will change the position in relation to other elements that are connected with the same hook. For example setting it to 1 and setting location to 'tab' will create a tab on the first place.
- *Add a custom video class* – add your class to video container.
- *Video max height and width* – will add css max-height and width in px. Use to reduce videos size. May be also useful if video does not display correctly (may happen when link embedded from external – not youtube and vimeo – site).
- *Autoplay* – videos will play automatically when page is loaded or popup button/tab/gallery thumbnail clicked. Will work only with uploaded videos, Youtube and Vimeo.
- *Video align* – will add css float. It's best to set it to 'none' to avoid display problems especially when video location is set to 'Popup Button'. May be useful to adjust video position in various themes.
- *Video clearing* – will add clearfix div under the video. May be useful when video location is set to 'tab' and tabs are broken after adding the video (which may occur in some themes) or when other display problems occur.
- *Margins* – will add css margin-left, margin-top etc. in px. May be useful to adjust videos position.

- *Upload a thumbnail* – upload an image that will be used as a thumbnail if video location is 'Image Gallery' or a 'Popup Button' with label set to 'Thumbnail'. Otherwise may be left empty.
 - *Select thumbnail icon* – if thumbnail is uploaded, you may choose an icon to appear on the thumbnail to distinguish the video thumbnail from others.
 - *Icon size* – will set the icon size in % in relation to thumbnails size (will be responsive).
 - *Icon position in thumbnail* – may be set to center, or one of the corners (if corners it's better to reduce the icon size)
 - *Icon opacity* – set the icon opacity
-

Popup button settings:

- *Button location* – set the location
 - *Location priority* – set priority
 - *Button color* – button background color
 - *Button text color* – button text color
 - *Button label:*
 - *Title* – use the video title which has been set in the field above
 - *Thumbnail* – use the image as a background, thumbnail has to be set in the field above
 - *Custom* – input it in the text field below
 - *Button align, button clearing, margins, paddings, border radius* – will adjust buttons display properties through css.
 - *Height, Width* – may be set instead of padding when button label is set to 'thumbnail'
-

5. After setting up videos press 'Save Videos' button or otherwise you'll loose all the changes.
6. Press 'Remove' to delete the video. After confirming it can't be undone (you do not need to press 'Save Videos' to save removing).
7. On top in bulk options you can remove all videos, or restore settings to default.
8. Also each video has a button: 'Restore default video settings' and 'Restore default button settings'. You can set defaults in WooCommerce -> Settings -> Woovideo -> Video Settings/Popup Button Settings.
9. In Popup Button Settings you can set in addition the 'popup overlay color' which will be the color of the background for popup videos.

10. In 'Add video to product list' you can add a video that will appear on top of the product list in your shop.

2.4 For developers

2.5 Hooks

Woocommerce hooks used in the plugin:

for video locations:

- tab: *woocommerce_product_tabs*
- image gallery: *woocommerce_before_single_product*
- popup button: *woocommerce_before_single_product*

for button locations:

- After 'Add to cart' button: *woocommerce_after_add_to_cart_button*
- After product info: *woocommerce_short_description*
- Under the product gallery: *woocommerce_product_thumbnails*
- Above the product summary tabs: *woocommerce_single_product_summary*

Notice: All hooks above have priority set to 100 by default, but you can change them adjusting the 'Location priority' setting)

for the video on top of the product list:

- *woocommerce_before_shop_loop* – **with priority set to 1**

Available display filters:

ct_woovideo_video_styles – handles video css styles
ct_woovideo_display_video – handles the whole video container display
ct_woovideo_button_styles – handles button css styles
ct_woovideo_display_button – handles the whole button display
ct_woovideo_icon_styles – handles icon css styles
ct_woovideo_gallery_videos – adds some custom classes to container that holds videos added to the image gallery

Settings page filters:

wc_ct_woovideo_video_settings – video default settings page
wc_ct_woovideo_button_settings – button default settings page
wc_ct_woovideo_list_video_settings – 'Add video to product list' settings page

'Edit Product' page actions and filters:

ct_woovideo_attributes – filter to handle list of video metadata
ct_woovideo_admin_panel_metabox – action on top of each video section
ct_woovideo_after_video_attributes – action at the end of each video section, enables adding some options to the form
ct_woovideo_video_save_atts – filter to handle list of vide metadata before saving

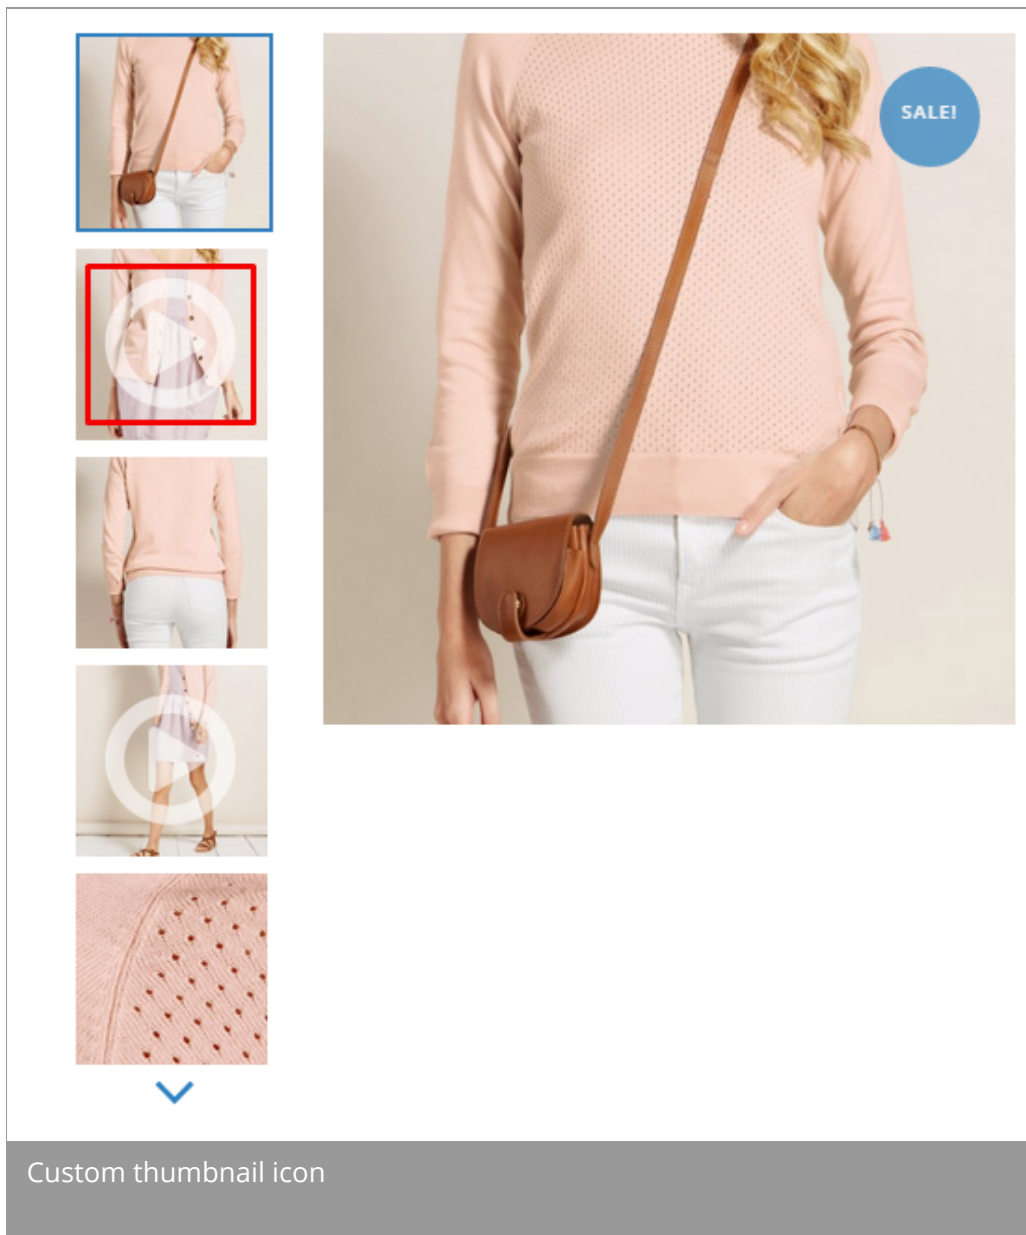

ct_woovideo_video_save – action to add some code before saving every video

ct_woovideo_before_save – action to add some code before saving all videos

ct_woovideo_bulk_edit_actions – action to add some bulk options

2.6 Custom Thumbnail icon

You can add custom video icon, which will be displayed on video thumbnails, like the below:

If you want to add your custom thumbnail icon add a png image file to the wp-content/plugins/ct-woovideo/assets/images folder and add the following code to your functions.php file:

```
1 //add a new icon to your 'video settings' page
2 add_filter('wc_ct_woovideo_icons' , 'add_woovideo_icon_setting', 1, 2);
3
4 function add_woovideo_icon_setting($icons, $path){
5     $icons['new_icon'] = '&img src="' . $path . '/images/new_icon.png"/&gt;';
6     return $icons;
7 }
8
9
```

```

10
11 //add a new icon to your 'edit product' page
12
13 add_action('ct_woovideo_thumbnail_icons' , 'add_woovideo_icon_admin', 1, 3);
14 function add_woovideo_icon_admin($loop, $video, $path){
15     ?&gt; &lt;label class="ct-woovideo-thumbnail-icon" for="ct-woovideo-select-icon7[&lt;?php echo
    &lt;input type="radio" autocomplete="off" name="ct_woovideo_select_icon[&lt;?php echo esc_attr($loc
    class="ct-woovideo-select-icon" value="new_icon" &lt;?php checked( $video['_thumbnail_icon'], 'new.
    &lt;?php
    }

```
